- 550+ highly skilled and dedicated workforce proficiently performing operations to consistently meet customer demanded quality standards.

Team SKS

Robust R&D/DESIGN Unit

Our R&D and Design unit at SKS is an advanced facility that empowers our team to innovate, conceptualize, and bring to life footwear designs that seamlessly blend style and functionality. Through meticulous research and development, we ensure that SKS stays at the forefront of design trends and technological advancements in the ever-evolving world of footwear.

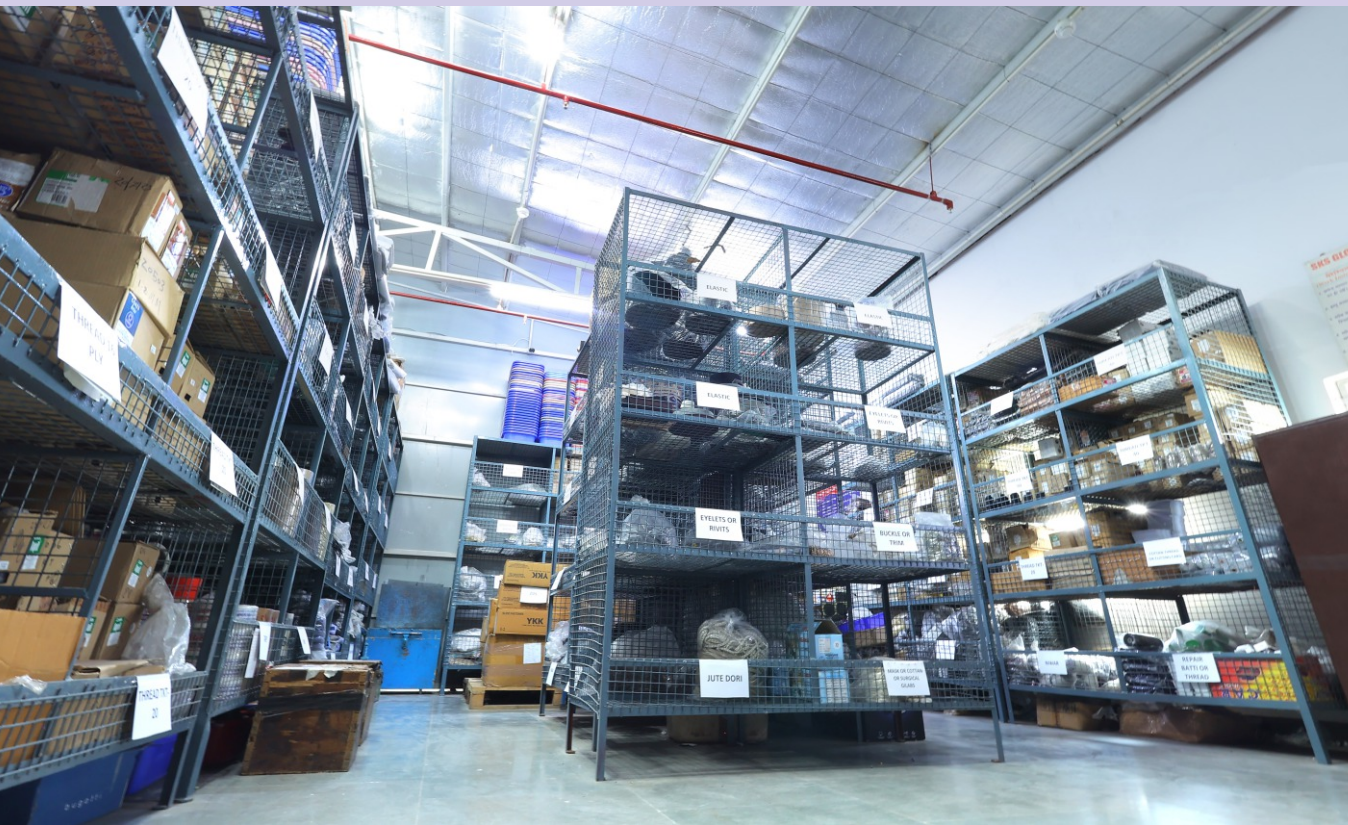

- **Separate R&D departments** for Footwear, Sole, and Shoe Last units.
- Design center specializing in footwear aesthetics.
- Dedicated designers committed to enhancing product value.
- **CAD/CAM facilities** for precision in design.
- **Shoe Last unit equipped with the latest SDF technologies.**
- Utilization of **3D printing** capabilities for innovation.

Design/Development

Strategic Sourcing

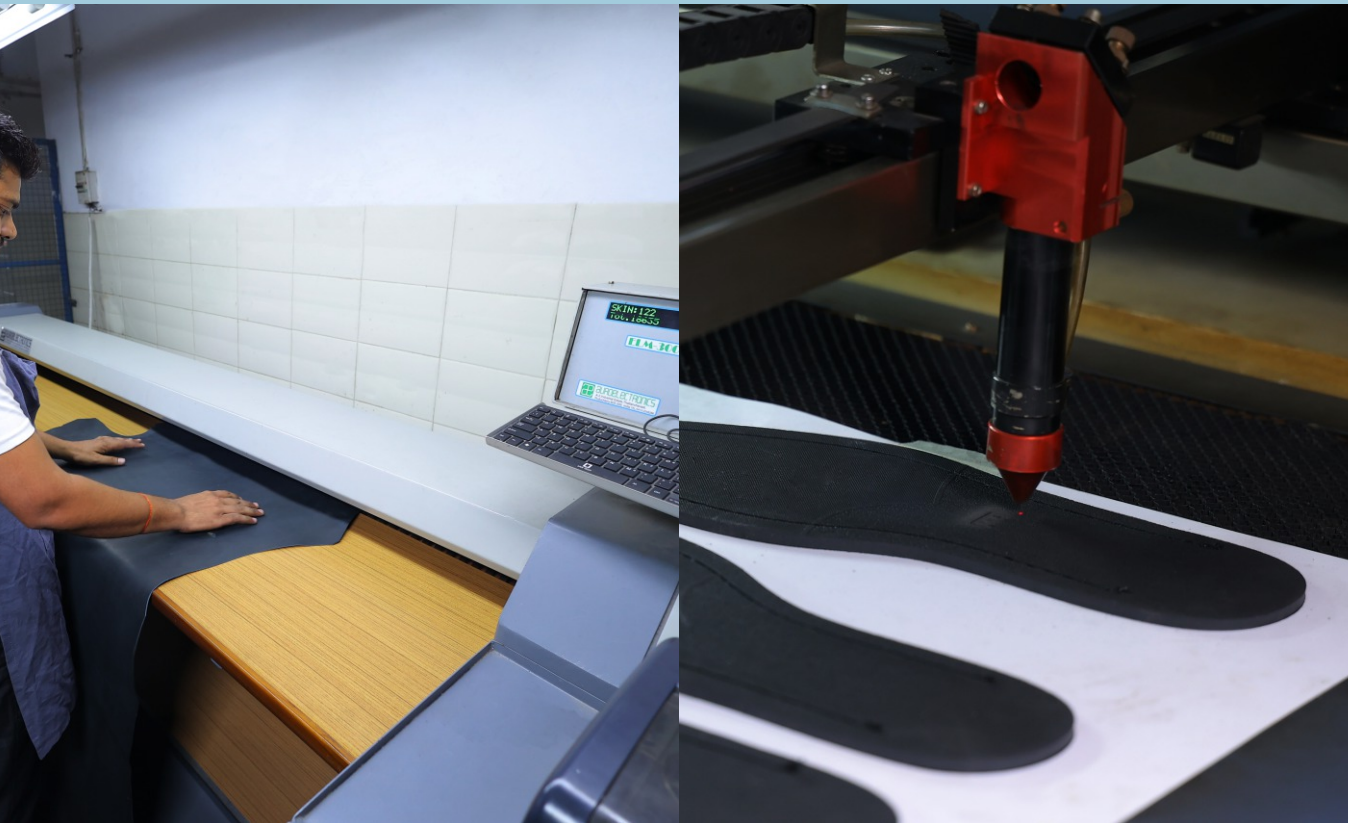

SKS Global leverages a strategic partnership with its sister concern for about 80% of raw material and component sourcing. This streamlined collaboration ensures not only a seamless supply chain but also enhanced control over the quality and consistency of materials. By synergizing with our sister concern, SKS Global fortifies its commitment to delivering footwear of exceptional quality while maintaining operational efficiency and reliability in the sourcing process.

- SKS Global's sister concern is a **leading supplier in India** for the latest buckles, ornaments, and other shoe accessories.
- We have a **sourcing office in China** for acquiring cutting-edge development and production materials, expanding our product portfolio.

Advantage Sourcing

Modern, Energy Efficient & Versatile Machines

Our production facility is fully equipped with a comprehensive range of high-end, modern machinery essential for every aspect of shoemaking. This ensures precision, efficiency, and adherence to the latest industry standards in the crafting of our footwear. We take pride in maintaining a cutting-edge infrastructure that enables us for the production of top-quality shoes. Our self-sufficiency is a cornerstone of our operations. We rarely need to outsource any work, thanks to our comprehensiveness. Even tasks such as laser work are seamlessly executed in-house, facilitated by our array of high-end machines. This holistic approach not only ensures efficiency but also guarantees that every aspect of our footwear production maintains the highest standards of quality under our direct oversight.

Advantage Machines

In- House Sole Manufacturing Unit

SKSGLOBAL
www.sksglobal.co.in

At SKS Global, our commitment to excellence extends to every step of the process. With our in-house sole manufacturing unit crafting handmade **prefab soles from rubber, EVA, leather**, and more, we gain a distinct advantage.

This vertical integration empowers us with greater control over pricing, quality, and timely deliveries—setting us apart from units reliant on external suppliers.

- A capacity of **1200 pairs** of pre fab soles per day
- **Italian machinery** used for pre fab sole making
- Adding new machines to enhance the quality

Advantage Soles

SMETA-SEDEX SA-8000

SKSGLOBAL

www.sksglobal.co.in

At SKS Global, our commitment to ethical standards and social responsibility is unwavering. We take compliance and certifications seriously, proudly holding **SMETA-SEDEX** and **SA-8000** certifications. These accolades signify our dedication to fair labor practices, ethical sourcing, and sustainable manufacturing.

As we continually strive for excellence, we view certifications not just as achievements but as benchmarks that inspire us to exceed industry standards in every aspect of our operations.
